The Changing Landscape of Campus Placements What Tier - 2 Institutions Must Know

by **Mr. Vikash Sharma,**
Head & Training Placement Officer

In 2025, campus placements across India are evolving and tier-2 institutions are beginning to catch up. A few emerging patterns suggest that success is no longer the sole domain of elite institutes.

Big Shifts in Hiring Trends

While top-tier institutes still draw bulk drives, many students from tier-2 and private colleges are securing jobs today not because of brand name, but due to skills, readiness and proactiveness. [LinkedIn+2The Times of India+2](#)

Companies are increasingly hiring based on competence over credentials. Skill-based assessments, project portfolios, coding tests, and certifications are becoming more important than a college's reputation. [LinkedIn+1](#)

The IT services and global capability centres (GCCs) sector has shown signs of recovery, with a projected 30 % increase in hiring activity in 2025-26 compared to previous years.

What This Means for Students in Tier-2 Colleges

- ✧ Students must proactively focus on skill-building coding, domain knowledge, communication, certifications rather than relying solely on degree or brand.
- ✧ Early internships, mock interviews, portfolio work and active participation in projects or extra-curricular tech work can significantly improve employability.
- ✧ Placement readiness must start early with 02nd/03rd year students. So, that they are industry-ready by the final year.

Opportunity for Institutions Like Us

For colleges such as ours, this changing scenario opens a window of opportunity:

- ✧ By investing in training platforms, industry aligned certifications, mock interview cells, soft skill programs, we can significantly enhance students employability.
- ✧ Effective industry collaborations, internships, and mentorship can bridge the gap between academic curriculum and real world expectations.
- ✧ With skill based hiring gaining ground, our students have a fair shot at national and even global recruiters provided we prepare them right.

The Way Forward

- ✧ At BRCM CET and sister institutes under BRCM Education Society, we are doubling down on empowering students for this new hiring paradigm. Our training & placement initiatives, skill-development programs, and collaborations aim to equip students not just with degrees, but with versatile skills, confidence and industry-readiness.
- ✧ The message is clear: in 2025 and beyond, talent, not tier, matters. And tier-2 institutions have the potential to produce industry-ready graduates — if we adapt, prepare, and evolve.
